PROFILE

Recent statistics graduate who likes turning messy data into answers people can act on. Most comfortable knee-deep in SQL; happiest when a chart finally makes a non-analyst say "ah, now I see it."

EXPERIENCE

Data Intern

Berlin Senate Department for Transport (thesis placement)

2025 — 2026

- Analyzed 2.3M bike-share trips for my bachelor thesis on weather impact on ridership
- Built a Python (pandas) pipeline that cut the department's monthly report preparation from 3 days to 4 hours
- Presented findings to a non-technical city planning panel; two recommendations adopted into the pilot program

Working Student — Business Intelligence

Marktplatz24 (e-commerce)

2024 — 2025

- Wrote SQL queries and maintained Metabase dashboards for the logistics team
- Caught a recurring data-quality bug that had inflated return-rate metrics by 12%

EDUCATION

B.Sc. Statistics

Humboldt-Universität zu Berlin

2022 — 2026

Thesis: quantifying weather effects on urban bike-share demand (grade 1.3)

SKILLS

Data: SQL, Python (pandas, matplotlib), R (basics)

Tools: Metabase, Excel, Git, Jupyter

Languages: German (native), English (fluent)
